

Axure RP

For individuals, freelancers, and small teams focused on prototyping

Axure RP **PRO**

For larger teams with an emphasis on documentation (i.e. enterprise)

Sketch & Wireframe

Sketch & Wireframe

Sitemap to organize pages

Built-in widgets for wireframing

Create custom widget libraries

Download widget libraries like icons and iOS widgets

Shapes like rounded rectangles, tabs, and ellipses

Masters for reusable patterns and templates

Drag and drop diagramming environment

Over 50 familiar keyboard shortcuts

Snap to grids, guides, and objects

Group, align, distribute, order, and lock widgets

Solid, gradient, and semi-transparent fills

Rich text formatting like font, bold, and line spacing

Import images or paste directly from other tools

Slice images (helpful with screenshots)

Rotate shapes and images

Background color on pages

Background color on pages

Background image on pages with repeat options

Sketch effects to create a hand-drawn feel

Flow Diagrams

Flow shape widgets with connection points

Connectors

Rounded or square connector corners

Variety of arrow ends for connectors

Variety of solid and dashed line styles

Connectors route around widgets

Connectors hop over other connectors

Basic Prototyping

Generate HTML/javascript prototypes without coding

View prototypes in browsers without a player

Unlimited viewers. The prototype is yours to share.

Respond to clicks

Link when clicking almost any widget

Text links inside widget text

Links that open popups or new browser tabs

Demonstrate multiple outcomes when linking

Center pages in the browser

Center pages in the browser

Logo and caption to brand your prototype

Advanced Prototyping

Respond to mouse enter and mouse out

Respond to key presses in the text fields

Respond to form fields getting and losing focus

Conditional logic (ex. A functional logic form)

Perform multiple actions in a response

Hide and show widgets with transitions like fade

Move widgets with transitions like bounce

Set widget text and values dynamically

Math and string functions to calculate values

Enable and disable widgets

Inline frames for external videos and maps

Scroll to page locations with transitions

Prototype drag and drop functionality

Store data in variables to pass from page to page

Initialize pages based on variable values

Pin to browser or "floating" widgets

Mobile Prototyping

View prototypes in iOS browser

View prototypes in Android browser

View prototypes in Android browser

Respond to swipes

Viewport settings for scaling

Hide browser address bar

Home screen icon for iOS and Android

Hide browser nav on iOS

Splash screen for iOS

Status bar style for iOS

Inertial scrolling in panels for iOS

AxShare Publishing

Publish prototypes hosted by Axure

Password protect your prototypes

Unlimited viewers

Enable discussions/feedback in your prototypes

Publish up to 10 prototypes at a time free

AxShare Pro option for more prototypes and branding

Specifications **PRO**

Page notes

Separate page notes into categories

Widget annotations

Customize annotation fields

Customize annotation fields
Generate Word specifications
Select content for specification
Configure single or two column layouts
Reorder specification content
Customize screenshots
Import your Word template
Customize the template styles and content
Include widget text for a content spec
Filtering by annotation value
Generate notes and annotations to view in Excel

Shared Projects for Teams **PRO**

Multiple people editing a project at the same time
Check out and check in at the page level
Automatic history of check ins with notes
Export any revision
Store projects on a network drive or SVN server
Work on checked out pages offline
Https or svn protocol to connect to SVN server
Authentication through SVN server
