

Key Features

- Support for BlackBerry® push email with seamless device management.
- Flexible design using IMAP, POP, SMTP, and DomainPOP services. Does not require a Server Operating System.
- Trusted security using DKIM, SenderID for authentication and verification, anti-spam engine, Bayesian filtering, SSL/TLS, backscatter protection, and an additional layer proactive malware prevention (via SecurityPlus plug-in).
- Custom scheduling and mail queuing for more flexible outbound mail management.
- Mobility enabled for use with BlackBerry®, Windows Mobile®, Palm®, Symbian®, or Apple® devices.
- Groupware enabled (Mail, Calendar, Contacts, Tasks, Notes, and Journals).
- Secure Instant Messaging application.
- Simplified archiving and rapid failure recovery.
- Multiple domain support and integrated web administration.

Trusted, Reliable, and Affordable. An Exchange Alternative Designed for SMB/SME Users

The MDAemon® Email Server has been deployed in over 90 countries around the world to meet the needs of small-to-medium businesses that require a reliable and secure on-premise mail server without expensive administration or high per-user costs. It simplifies messaging and collaboration requirements with an intuitive, user-friendly design offering enterprise-class features that can be managed with minimal training and support. MDAemon can be up and running in under 10 minutes. The Windows-based mail server requires almost no maintenance and offers the flexibility of remote administration to make email management simple.

MDAemon 11 supports BlackBerry® push email, offers seamless email management, and includes unique features like Inbox Mapping™ and controls for BlackBerry composed emails to comply with a company's security policies.

Key Benefits

Highly Secure. Incorporates multiple layers of security techniques such as Relay Controls, IP Shielding, SMTP Authentication and reverse lookups, to minimize possible server exploits.

Collaboration. Mail, Calendar, Contacts, Tasks, Notes and Journal. Supports Microsoft Outlook® via the Outlook Connector for MDAemon application.

Easy Administration and Maintenance. Intuitive, task-based GUI, easy account database integration (via Active Directory, LDAP, ODBC, or MDAemon's Minger verification), plus simple back-up and restore.

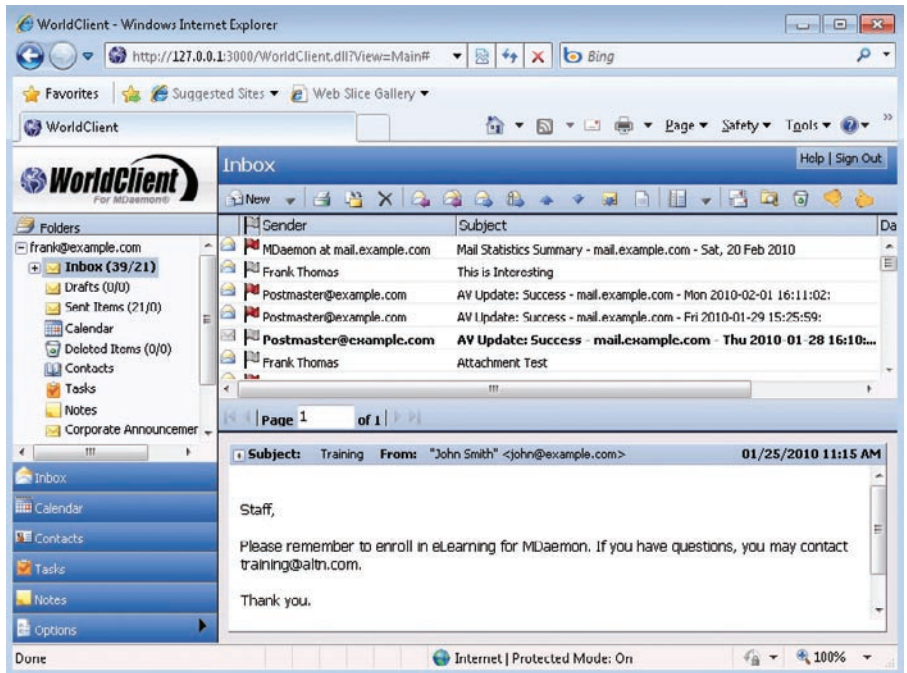

Remote Access. Access email from anywhere using the integrated web mail client or perform remote account management from the administrative application.

Integrated Messaging Client. Provides email and calendar notification with secure Instant Messaging for complete and flexible inter-office communications.

Powerful Mail List Engine. Create and manage bulletins, discussions, and distribution lists easily to effectively communicate on multiple levels.

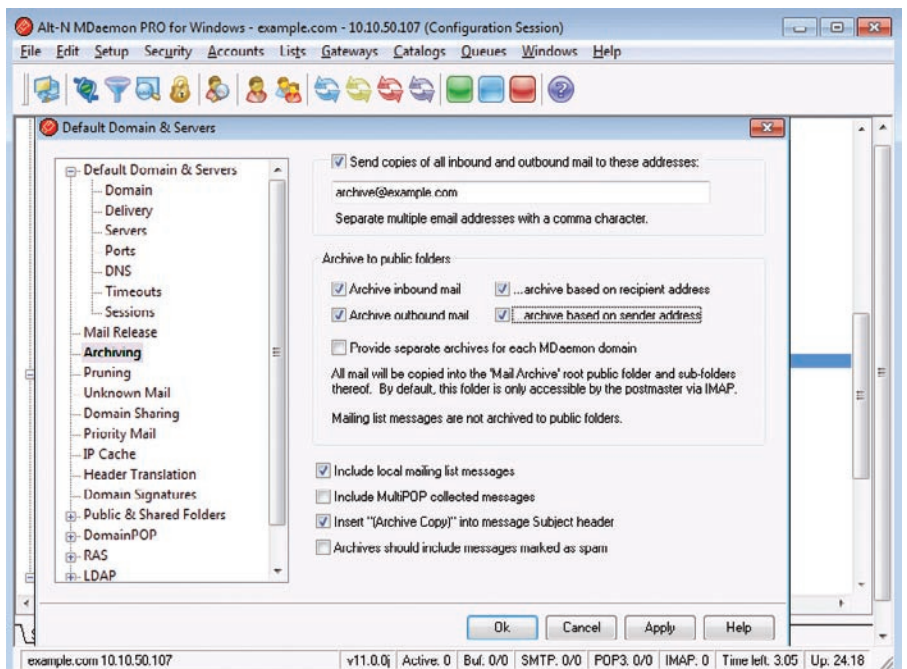

System Requirements

- Computer with Pentium III 500 MHz (or higher) processor (Pentium 4 2.4 GHz or higher recommended)
- 512 MB of memory (1 GB recommended)
- Typical Hard disk space required: 100MB, plus additional space for stored mail
- Microsoft Windows XP/2000/2003/ Vista/2008/7® (including 64-bit versions)
- Internet Explorer 5.5 or higher
- Ethernet Network Card
- TCP/IP network protocol installed
- Internet or Intranet communication capabilities.

The easy-to-use webmail client offers over 25 languages and an intuitive user experience.

ComAgent instant messaging plug-in, included with MDAemon®, provides secure instant messaging (IM), address book synchronization, and an email notification tray applet that provides quick access to MDAemon's webmail client email features.
